For best results, use watered-in applications. May be applied via irrigation system or prior to irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach. Use the higher label rates with surface and flood irrigation. Shake well and/or agitate before each use. DO NOT mix with other products in concentrated form without first adding water. Recommended mixing sequence: water, adjuvants, pesticides, FBSciences nutrient products, other fertilizers then agitate. A standard jar test is recommended before tank mixing.

**INSTRUCCIONES DE USO**

Para obtener mejores resultados, usar aplicaciones por medio del riego. Puede aplicarse a través del sistema de riego o antes del riego. Aplicar suficiente agua para mover el producto al área de enraizamiento activo, pero no en cantidades excesivas que puedan filtrarse. Usar las dosis de etiqueta más altas con riego de superficie e inundación. Agitar bien y / o agitar antes de cada uso. NO mezclar con otros productos en forma concentrada sin antes agregar agua. Secuencia de mezcla recomendada: agua, adyuvantes, pesticidas, productos nutritivos de FBSciences, otros fertilizantes y luego agitar.
