

Ocean Swell™

PREMIUM SEAWEED PRODUCT

NEW
PRODUCT

Ocean Swell™ is a premium seaweed product enhanced with FBS Transit® biostimulant technology, delivering a powerful tool that increases the plant's ability to defend itself and recover from stress including heat, drought, frost, and high salinity environments. The system of anti-stress compounds, including antioxidants, work across multiple metabolic pathways so the plant is able to thrive in a wide range of growing conditions. Ocean Swell is suitable for use in liquid foliar, soil applied, and most drip and micro irrigation systems for application to the roots.

The synergies between *Ascophyllum nodosum* seaweed and FBS Transit biostimulant technology trigger multiple antioxidant systems, delivering a powerful tool to manage environmental stress.

Advantages of Ocean Swell™

- Powerful tool to increase tolerance to and recovery from environmental stress
- Dual biostimulant activity triggers multiple antioxidant systems for heightened stress resistance
- Supports cell division and cell differentiation based growth for more productive and healthier plants
- Superior performance delivered at rates comparable to other seaweeds
- Compatible with a wide variety of fertilizers

Ascophyllum nodosum is primarily found in the Northern Atlantic in harsh conditions including cold waters and big tides. This puts enormous stress on the seaplant which creates unique survival strategies, triggering anti-stress compounds.

TECHNICAL INFORMATION

Ocean Swell is suitable for use in liquid foliar, soil applied, and irrigation water applications. Regular applications are important for maximizing crop potential during unexpected stress.

RECOMMENDATION

Directions for Foliar Applications

DO NOT spray in the heat of the day or when the plant is under moisture stress. DO NOT spray to the point of runoff. Use as fine of a spray mist as possible. Allow 3-4 hours after application before sprinkler irrigating to avoid washing the product off.

Rates for Foliar Applications:

Trees and Vines

4-8 pints/acre. Repeat as needed every 3-4 weeks.

Field and Row Crops

2-4 pints/acre. Repeat as needed every 3-4 weeks.

Directions for Soil Applications

For best results, use watered-in applications. May be applied via an irrigation system or prior to irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach. Use the higher label rates with surface and flood irrigation.

Rates for Soil Applications

Trees and Vines

2-4 quarts/acre. Repeat as needed every 3-4 weeks.

Field and Row Crops

1-2 quarts/acre. Repeat as needed every 3-4 weeks.

COMPATIBILITY

Shake well and/or agitate before each use. Do not mix in concentrated form with any other tank additive without first adding water. Recommended mixing sequence: water, adjuvants, pesticides, FBSciences nutrient products, other fertilizers, balance of water while agitating. A standard jar test is recommended before tank mixing.

See product label for complete Directions For Use.

0-0-1

GUARANTEED ANALYSIS

Soluble Potash (K₂O) **1.0%**

Derived from: Kelp (*Ascophyllum nodosum*)
and potassium hydroxide.

Net Weight

8.6 lbs per Gallon @ 68° F

1.0 kg per Liter @ 20° C

ESSENTIAL ON A WIDE VARIETY OF CROPS
