**DIRECTIONS FOR USE**

DO NOT spray in the heat of the day or when the plant is under moisture stress. DO NOT spray to the point of runoff. Use as fine of a spray mist as possible. Allow 3-4 hours after application before sprinkler irrigating to avoid washing the product off. Shake well and/or agitate before each use.

Recommended mixing sequence: Adjuvants, pesticides, FBSciences nutrient products, other fertilizers, balance of water. When mixing with high phosphate fertilizers, add a citric acid buffer until the pH is 4.5 to 5.0 to improve compatibility and uptake. Ensure agitation is available when mixing with calcium fertilizers. A standard jar test is recommended before tank mixing.

**RATES & TIMING FOR ALL CROPS**

Apply **1-6 pints/acre** any time during the growing season; repeat as needed. Use the higher rate with spray volume greater than 50 gallons per acre.

**INSTRUCCIONES DE USO**

NO rociar en el calor del día o cuando la planta esté bajo estrés por humedad. NO rociar hasta el punto de escorrentía. Usar una niebla de rociado lo más fina posible. Esperar de 3 a 4 horas después de la aplicación antes del riego por aspersión para evitar lavar el producto. Agitar bien y / o agitar antes de cada uso.

Secuencia de mezcla recomendada: Adyuvantes, pesticidas, productos nutrientes de FBSciences, otros fertilizantes, balance de agua. Cuando se mezcle con fertilizantes de alto contenido de fosfato, agregar un regulador de ácido cítrico hasta que el pH esté de 4.5 a 5.0 para mejorar la compatibilidad y la absorción. Asegurarse de que la agitación esté disponible cuando se mezcle con fertilizantes de calcio. Se recomienda una prueba de jarra estándar antes de mezclar el tanque.
