

DESCRIPTION

Drip Transit is a soil-applied liquid nutrient designed specifically to be applied with high phosphate fertilizers through drip irrigation. High phosphate fertilizers can be mixed with Drip Transit and applied with irrigation water that is high in calcium and/or other elements and salts.

DIRECTIONS FOR USE

Total injection time for the fertilizer plus Drip Transit must not exceed 4 minutes per acre treated if the system flow is >2000 gallon per minute (i.e. 80 minutes or less for a 20-acre block). If <2000 gallons per minute, injection time must be less than 6 minutes per acre (i.e. 120 minutes or less for a 20-acre block). Drip Transit is compatible with all irrigation water and is for use only with high phosphate fertilizers injected through drip irrigation systems. Shake well and/or agitate before use.

RATES & TIMING

All Crops	1.5 GALLONS PER ACRE	Apply anytime during the growing season.
