# Gold Flower™ 0-7-7

## **DESCRIPTION**

Gold Flower is a liquid nutrient product that is one part of a multi-part nutrient system for use on all plants. Designed to be used in all growing systems/media including hydroponics, rockwool, potted plants, coconut fiber, and/or soil media drip irrigation systems.

## **DIRECTIONS FOR USE**

Use Gold Flower at 2-30 ml per gallon of water each week during the growth cycle of the plant. FBSciences Gold nutrient products work together to form a nutrient system that should be applied to the plant based on recommended ratios. The rate at which Gold Flower should be applied will shift from week to week. Consult your FBSciences representative for ratio details. Never mix FBSciences Gold nutrient products together in concentrated form. Add one FBSciences Gold nutrient product to fresh water with complete agitation, and then add other FBSciences Gold nutrient products. Adjust nutrient water pH to 5.2-6.5. Adjustment may be required due to water quality. Shake well before use.

For field applications consult your local agronomic professional.

## **READ ENTIRE LABEL BEFORE USE**

## **KEEP OUT OF REACH OF CHILDREN**

## **HAZARD STATEMENTS**

Not classified as hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200).
