

Copron[®] Soil

AN ADVANCED 5% COPPER SOIL FORMULATION

Copron[®] Soil is a premium soil-applied Copper product designed to resolve Copper deficiencies in all crops including tree nuts, vineyards, fruit, vegetable, grain and forage crops. Copron Soil is built with a proprietary blend of FBS Transit[®], our patented technology which helps nutrients by-pass soil tie-ups by promoting the rapid uptake, absorption and translocation of nutrients within the plant. This powerful combination makes the Copper more efficient and available to the plant.

- Increases Respiration/Protein Synthesis
- Improves Enzyme Production
- Improves Lignin Production (Woody Fibers) for Bark Health
- Prevents Leaf Curl
- Improves Stalk Strength to Reduce Lodging
- Increases Copper Uptake
- Better Stress Resistance
- Improves Plant Health & Quality

Copron Soil Resolves Copper Deficiencies

Deficient Leaves

Healthy Leaves

Symptoms of Copper Deficiency include:

- Symptoms Show First on New Leaves, but Persist onto Older Leaves
- Stunted Growth
- Leaf Edges Curl & Bend
- Poor Shoot or Stalk Strength Leading to Willowy Growth or Lodging
- Leaves Lose Turgor and Develop Bluish Green Color on Vegetable Crops
