

Feeding Chart - General Guidelines

RECIRCULATING HYDROPONIC SYSTEMS

Mix FBS Gold nutrient products based on specific applications by altering the Gold Foundation, Gold Fill, and Gold Oratios. Never mix FBS Gold nutrient products together in concentrated form. Add one FBS Gold nutrient product to fresh water with complete agitation, and then add other FBS Gold nutrients. Adjust nutrient water pH to 5.2-6.5. Adjustment maybe required due to water quality. Refer to suggested feeding chart for mixing recommendations.

GROWTH STAGE	EARLY VEGETATIVE	VEGETATIVE	BLOOM	LATE BLOOM
Gold Foundation (5-0-0)	18 ml	15 ml	13 ml	5 ml
Gold Fill (2.5-2.5-5)	10 ml	20 ml	15 ml	10 ml
Gold Flower (0-7-7)	0	0	40 ml	60 ml
Gold Bullet (0-0-1)	1.5 ml	3 ml	5 ml	5 ml

*All measurements are in mls per one gallon of water (1 gallon = 3.785 litres)

** Non-established seedlings should use 5 ml Gold Foundation, 2 ml Gold Fill, & 1 ml Gold Bullet

1 teaspoon = 5 ml	1 tablespoon = 15 ml	1 ounce = 30 ml
-------------------	----------------------	-----------------

FBS Harmony™ can be used as an acidifying buffer to adjust pH down to the meet the ideal pH range.
