

# GARLIC CROP PROGRAM

## Planting

Supports rooting and early plant establishment and vigor

**At planting / transplanting in a banded application with phosphate fertilizers and liquid humic acids**

**Transit Soil® at 8-10 ounces/acre**

## 4th Leaf

Supports enhanced leaf size and chlorophyll density for maximum photosynthesis

**Transit Soil at 8-10 ounces/acre**

**Zicron® Soil at 2-3 quarts/acre**

## 8th-9th Leaf

Supports cellular strength, clove size and storability

**Injected in the irrigation with fertilizers**

**Calron® Soil at 2-3 quarts/acre**

**Transit Soil at 6 ounces/acre**

*This program can be adapted to individual field or farm conditions based upon soil and tissue tests. Rates can vary and additional FBS products can be substituted to address specific nutrient deficiencies or stress situations.*
