

## **In-House Web Developer**

**Job Type:** Full Time, Remote Position

**Timing:** Immediate

FBSciences is a global leader in the discovery and commercialization of naturally derived plant health technologies. We provide environmentally safe, sustainable agricultural solutions to farmers and growers with products that increase yields and profitability. We are looking for a curious, passionate, and hard-working individual to join our expanding team.

FBSciences is currently seeking an In-House WordPress Web Developer to join our growing team. The ideal candidate will be responsible for both back-end and front-end development, including creating WordPress themes and plugins. This position requires a combination of programming skills (namely PHP, HTML5, CSS3, and JavaScript) and aesthetics (understanding element arrangements on the screen, the color and font choices, and so on). The candidate should have a strong understanding of industry trends and content management systems. Experience with the responsive and adaptive design is strongly preferred. Also, an understanding of the entire web development process, including design, development, and deployment is preferred. The ideal candidate will have good communication skills and the ability to work within a team.

### **PRIMARY RESPONSIBILITIES**

- Modify, update, and expand company website according to specifications
- Design and implement themes and plugins including video and other functions
- Establish and guide the website architecture
- Manage all technical aspects of CMS
- Identify and resolve areas of opportunity on the website
- Assist with SEO
- Conduct website performance tests
- Work cross functionally with marketing to improve user experience on website
- Conduct WordPress training sessions with colleagues
- Manage time and priorities
- Work positively in a fast-paced environment
- Maintain communication and accountability with other teams

### **BACKGROUND & EXPERIENCE**

- BA in Computer Science or related field
- Good understanding of front-end technologies, including HTML5, CSS3, JavaScript, jQuery
- Experience building user interfaces for websites and/or web applications
- Experience designing and developing responsive design website
- Ability to understand CSS changes and their ramifications to ensure consistent style across platforms and browsers
- Ability to convert layout and wireframes into working HTML pages
- Strong understanding of PHP back-end development
- Understanding of optimization & implementation of online security
- Experience in Tableau a bonus

**Salary and bonus structure based upon experience and qualifications. This position offers a complete benefit package, including health and dental insurance, and possible stock options.**
